

Hydraulic Dock Leveler

◆ Model : DCQ15-0.5

FEATURES:

1. Excellent design, compact hydraulically controller,
2. Imported Hydraulic system, easy to operate and reliable operation.
3. Lip plate and platform used to connect the whole axis, high strength and reliability.
4. Imported seals to protect the hydraulic system in an excellent sealing performance.
5. Overall module imported hydraulic station, sealing and long service life.
6. High-intensity "U"-shaped beam design to protect their long-running high-load without deformation.
7. With non-slip tread plate, the platform has a good skid resistance.
8. Both sides of the fortification rolling pin apron, to prevent accidental injuries caused by the toes stretching platform.
9. Protection of maintenance personnel to enter the board with an internal bridge maintenance safety rod.

SPECIFICATIONS:

Model	DCQ15-0.5
Loading Capacity(Kg)	15000Kg
Lip Length (mm)	400mm
Platform Size	2000*2000mm
Work Range- up	250mm
Work Range- down	250mm
Motor Power	0.75Kw
Power Supply	380V 50Hz
